What quality of life do organic cows have?

**Q.**  
How many cows can a farmer keep inside their barn?

**Step 2**  
Calculate the area of the barn (length x width)

**Step 1**  
Measure the length and width of the barn

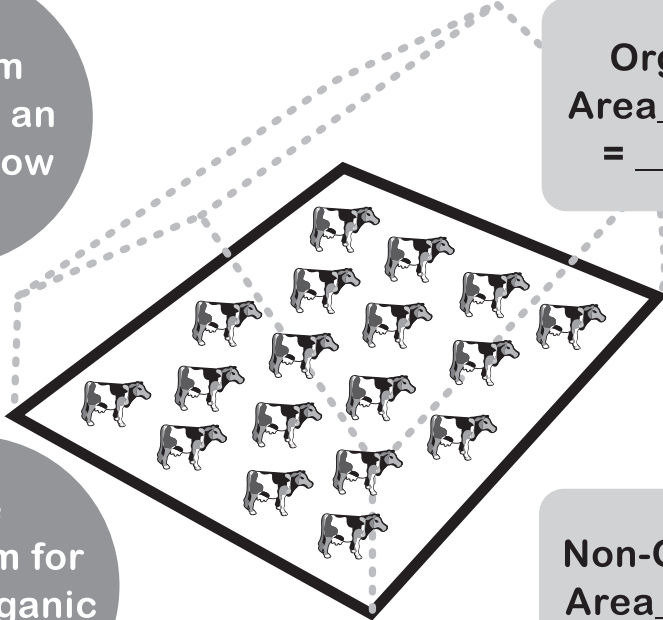

Width \_\_\_ m x Length \_\_\_ m  
= Area \_\_\_ m

The minimum space for an organic cow is 7m

**Step 3**  
Calculate how many cows can be kept in the barn

**Organic Cows**  
Area \_\_\_ m<sup>2</sup> ÷ 7m<sup>2</sup>  
= \_\_\_\_\_ COWS

The minimum for a non-organic cow is 4m

**Non-Organic Cows**  
Area \_\_\_ m<sup>2</sup> ÷ 4m<sup>2</sup>  
= \_\_\_\_\_ COWS
