

Prehistoric field boundaries ● ● ●

Using a 20 metre tape, measure the 4 boundaries of the Bronze Age field marked A - D.

Boundary A

.....m

Boundary B

.....m

Boundary C

.....m

Boundary D

.....m

Now work out the approximate area of this field. (multiply A times B)

Field area:

.....m²

How does this compare with modern field sizes?

Using a pencil, mark in as many other field boundaries that you can see on the aerial photograph. Why are the boundaries not very clear?

Hut Circles Orienteering

Refer to the aerial photograph and at each hut circle marked with a number find the wooden block which has a letter.

Note down the letters in the boxes right. The letters form a word :
